About the Book: "

The words in this book are "Memories of a Dialysis Patient"

Conception of a Dialysis Patient (the Untold Truths) Paperback - April 24, 2014

By Fayton Hollington Paperback: 298 pages

Publisher: Outskirts Press (April 24, 2014)

Language: English ISBN-10: 147873163X ISBN-13: 978-1478731634

About the Author:

Mr. Fayton Hollington Published Novelist/Award Winning poet Spoken word Artist SAG-AFTRA

Words from the Author

Battling Lupus at twelve, introduced me to the Nephrology world. Lupus vanishes, but renal damage remains. Seventeen years later, my kidneys fail, and dialysis becomes my world. A donation from a sibling liberates me after seven months. Seven years afterwards, the transplant rejects, and dialysis pulls me in once again.

Vol 2 No 4 (2014) ISSUE – December ISSN 2347-6869 (E) & ISSN 2347-2146 (P)

Book Review: Conception of a Dialysis Patient (the Untold Truths)

The Review:

'My arm was opened between the forearm and the bicep at the elbow'

`Autoimmunity is the failure of an organism in recognizing its own constituent parts as self, thus leading to an immune response against its own cells and tissues.'

It would likely be impossible for anyone to read this rather extraordinary memoir by Fayton Hollington and not feel a cramp in the body and the psyche, attempting to identify with the story revealed here. This is one of those book that not only teaches the reader about a condition few have even heard about much less understand while at the same time presenting the spirit of a survivor against all odds. It is a revealing exposé about the medical fields of kidney dialysis and kidney transplantation - far more complex and enigmatic than the public understands.

None of this would be so profound were it not for the quality of writing that Fayton Hollington brings to the book. Hollington is a writer - of two other books and a number of screenplays as well as poetry that will surely gain recognition following the most assured success of this debut. The name may not be immediately recognizable at present, but in time that will change.

Hollington is an African American man from a large family. His father was killed when he was young, forcing his mother and his siblings to move form Harlem to Long Island. And that is where his story begins. He contracted a viremia-like syndrome with high fevers and a dermatological nightmare of abscess-like lesions on his body. Eventually the diagnosis of systemic lupus erythematosis was made and despite medical treatment of a poorly understood illness he went into renal failure and required renal dialysis just to stay alive. He underwent kidney transplantation but eventually rejected that donated kidney and now he remains dependent on dialysis.

In this book Hollington shares the marriage of chronic renal failure patients to the dialysis machine and his in depth discussion of that is both harrowing and informative. Few people can describe the fateful bond between machine and life the way this fine author does. Place this book in the column of `must read' - it is both a humbling and a challenging experience and reveals the soul of a man whose spirit is indeed indomitable.
